Lay Summary (500 words max)

The research advisory group contains medical professionals, patients, family members, and members of the public involved in aortic dissection research. This section will be used to judge the importance of the study and will be used on the website for information if the application is successful. You should include background, aim, methods and expected value of results. It is expected that the lay summary details the key aspects of the study for a literate, but not medically trained individual.

Details of funding requested (500 words max)

Please include a full breakdown and justification of funding requested for this study, which must include details of salaries, consumables, equipment, and travel.
